Colored nano polishing suspension

Colored nano polishing suspension • Technical datasheet

Document: MC-DS-70-EN • Generated: 2026-11-14

Purple/blue: nanoscale fine polishing for semiconductor wafers, optical glass, sapphire and glass-ceramics. Green: submicron fine polishing for optical lenses, fibre-optic connectors and precision optical components. Yellow: submicron semi-finishing for optical instruments, precision moulds and stainless-steel mirror finishes.

Orange: micron-scale intermediate polishing for optical glass, cemented carbides and ceramic substrates. Red: micron-scale coarse polishing for multi-fibre optical connectors and metal workpieces.
